Subject: Re: [Plejarens_are_real_2005] Michael Horn and List

Hi Ike et al,

I'm inserting a few comments below but, so that this can be seen first, I direct you to the home page of www.theyfly.com and the link [SCIENTISTS CONFIRM MEIER'S INFORMATION...30 YEARS LATER!](#) It leads to information regarding four separate headline news stories that appeared during the last week of January where Meier had already published advance warnings as far as up to almost 30 years ago. This may help make you become further aware of information that Meier published prior to events occurring. And before we hear another "anyone could have said that", please, provide evidence of someone who did, who, in fact, actually said **ALL** of it and all that Meier has published prior to events occurring.

Meier's info re animal-human hybrids (with specific mention of human-pig experiments) and the spread of Mad Cow Disease to other species was first published in 1995 in the 251st Contact. Not good enough? Well, it was reproduced in *And Yet They Fly!*, published in 2001, still well before those events occurred.

Also in 251, along with the U.S. attack on Iraq and four other specific items, is the warning about the upsurge in Islamic extremist violence globally. The dangers to France and Italy from Islamic extremists is first mentioned in a contact from November of 1981 and again in the Henoah Prophecies from 1987, "**And it will be that the fanatics of Islam will rise up against the countries of Europe** and all will shake and quiver. Everything in the West will be destroyed; England will be conquered and thrown down to the lowest level of misery. **And the fanatics and warriors of Islam** will retain their power for a long time. However, not only Europe will be affected but ultimately all the countries and peoples of the Earth, as the great horror expands to a war that will encompass the entire world."

Seems pretty specific to me.

A note to Ike about his comments regarding "a competent magician", etc. You may be unaware that **ALL** of the so-called competent magicians at CFI-West failed to be able to duplicate **ONE** of Meier's photos and didn't even attempt to duplicate **ONE** of his films as they claimed they could in February of 2001. And I have to point out that you are still impugning the integrity of Stevens, Vogel and Norton and Pestalozzi without offering any substantiation. Are your own credentials as substantial as theirs? Can you prove it? We know a lot about Stevens and Vogel but only know that there's an "Ike" out there who has cast aspersions about people and their work while remaining effectively anonymous.

Now, since you referred to the predictions that were in the same 251st Contact as the

Jupiter information, I am including a scan of the parts of Meier's conversation with Semjase that contain most of them, as well as some of Meier's own calculations and comments. I first saw this in 1986. The person I got from was Randy Winters, who had obtained it a couple of years before. And, while it's an "unofficial" translation to the best of my knowledge, it was certainly made before Winters got it.

If one wants to believe that this is still some monumental, impenetrable hoax, despite the enormous amount of specific, yes specific, complex, accurate information in it, then there is very little that can be done to help them. Reasoning alone, when all the facts in evidence are taken into consideration, shows that not only is it virtually impossible for this resource-less, unaided, devoid of technology, one-armed man living in rural Switzerland, raising a family with three children while renovating a rundown farm house, working as a night watchman, taking 1,200+ clear daytime photos and films of UFOs, recording their sounds, publishing prophetically accurate information contained in transcriptions of conversations (with each of the ET person's sentences numbered), to do all this but even the biggest batch of know-it-all "professional skeptics" remain unable to duplicate any part of his feat...not even one, tiny little photo.

Oh, did I mention that they won't even acknowledge the freely available sound recordings and my suggestion that they duplicate them?

So, here's something else for the skeptics to go over. Billy may even have made some mistakes in his own calculations that perhaps Ike can find and then use to reassert that, after all, it's a "hoax".

In this reproduction the sentence numbers did not translate into this format. For those who may be unaware, this conversational format is the one in which most of the prophetic (and other) information is to be found. So, in addition to all the other remarkable abilities that the skeptics infer that Billy possess, I guess he's a brilliant first class novelist as well (one who can produce this stuff on demand in record time).

Please also note that since Stevens had this in his possession (yes, Ike, I accept his given word unless **YOU** can prove otherwise) on March 9, 1979, Meier would have not only had to have gotten, translated and edited all of the information regarding Jupiter and Io, including the findings that Io was the most volcanically active body in the solar system that wasn't announced until March 12, he would have had to sit down and invented all of this information as well as the rest of the voluminous contact, hundreds of lines of content.

Remarkable as Billy may be, there is no evidence that he did so.

MH

Contact #115, dated October 19, 1978

Semjase:

As first sign of the progressed fulfillment of the end-time-destiny, a sectarian massacre will take place, for which many political personalities will be severely indebted. Due to murder and forced mass suicide, about 200 children and approximately 1,023 adults will find their death, while of all these, however, only a number of approximately 1,000 will still be found.

This drama will take place in Jonestown, a settlement in Guyana, named after the megalomania- and consciousness-damaged sectarian leader, Jim Jones, who emigrated to Guyana with a large portion of his fanatic and by hypnosis influenced followers, and established a settlement there, where he keeps his believers like slaves. Through a written recommendation of many political personalities in America, he succeeded in the immigration with his followers to Guayana, where he leads a barbarian regime. At the time after the middle of November, it will happen that due to force and hypnosis, he will evoke fanaticism, to which over one thousand people will fall victim. Many will voluntarily ingest a offered poison and also kill their children with it, while others will be forced to do so and a rest will fall due to bullets from murder-hands. The extremely degenerate sect, called 'People's Temple', or 'Union of the People's Church', is politically very engaged and recommended by American politicians, who carry much of the blame, that it will come to this horrible massacre, because they were the ones, who smoothed and freed all the roads for the insane Jim Jones . . .

Billy: On the other hand, I wonder if the Voyager I, sent on its journey by the U.S.A., will bring in good results.

Semjase:

According to our calculations and the flight path of the probe, it has to pass very closely by Jupiter and several of its moons, which means that good results would have to be achieved, if the apparatus of the exploration unit work flawlessly.

Billy: Does this mean that the time will come, when the scientists in truth will discover that the so-called red spot of Jupiter is a rotating and crater shaped hole on the wildly heaving surface of this incomplete sun, and that this funnel-hole is the center of a gigantic and many millenia-old storm? And does this also mean that now well be discovered, that not only Saturn and Uranus possess a ring, but Jupiter as well, only that this one is much thinner and smaller than the other two around Saturn and Uranus?

Semjase:

Sure, even that has to be noticed, because the probe will be steered so closely to the heavenly body, that it has to record these matters.

Billy: Aha, and will then perhaps also be discovered, that the ring around Jupiter, for the most part, consists of particles catapulted outward by large volcanos of the moon, Io, which partially are captured by Jupiter while, however, the largest portion of all the outward catapulted material again falls back on Io, and practically closes all volcano openings again, but also the gigantic plateaus and mountains, which this moon, in contrast to the other moons of Jupiter, proves to have no carter landscape, but a fantastic evenness, despite the many craters?

Semjase:

You have listened very closely to my explanations on your journeys with me and admirably retained them in memory.

Are you able to remember still other things?

Besides, these facts will with certainty be discovered by this exploration device.

Billy: Fine, naturally, I still know a few more things, because I did not forget everything that you and Ptaah explained to me. I am able to remember rather well, that the various large Jupiter moons were of various colors, as for instance red, yellow, brown and white as also orange. I also still know, that you said to me, Jupiter actually should have become a sun, but its measurements were too small, so that this star really could have developed into a sun. Nevertheless the entire structure principally consists of liquid helium and hydrogen. Also I know still that you or Ptaah explained to me that chiefly potassium salts and sulphur combinations would constitute the surface and deep into it, and that everything has settled as a very thick crust, after the masses of water on this satellite had receded. Particularly, I think to remember, you said that especially the moon, Io, once was totally covered with water. If I remember correctly, you said to me, I do not know anymore whether you or Ptaah, that the moon Europa is exactly the stark opposite of Io, that there the masses of water not evaporated and changed, but that they are frozen to a gigantic armour of ice. In addition, you told me many other things and gave me explanations, of which I still remember a lot. Thus you also told me, that a particular moon would only measure approximately 200 km in length, which I defined as a gigantic hen's egg. I believe it was the moon closest to Jupiter, the name of which I do not remember any more.

Semjase:

In all things you have an admirable memory.

The moon, which you have just mentioned, is call by you, Amalthea.

The moon, Io itself, of which you said several things, moreover is the most volcano-active planetary body in the SOL-system.

That was explained to you at that time, if you are still able to remember?

Billy: Naturally, such things I do not forget so fast. You said at that time, that this moon was much more active volcanically than the Earth. Besides, I still remember exactly, you explained that the mile-size cloud formations in the storm funnel of Jupiter would move at extremely high velocity and in a counter-clockwise direction.

Semjase:

Sure, that I explained to you.

Billy: Now I am still wondering, if regarding the volcanic action on the moon Io, I remember correctly. If I am right, then you explained that the volcanic eruptions there would occur with primordial power and resemble monstrous explosions, which would thrust up their ejected material like atomic mushrooms, whereby sometimes heights would be reached up to 180 kilometer. Principally, it involves dust particles, gasses, ashes and some magma, but which would reach ejection velocities up to 2,300 kilometer per hour and beyond, as due to the lack of atmosphere of the moon, only minute resistance power is present. But you also said that the largest portion of all ejected material again falls back on the moon, as I already mentioned before. The rest, you explained, would be pushed out into space, while a part of it is drawn by Jupiter and very slowly densifies in its ring to a heavy sulphur-ion-combination. Is that correct?

Semjase:

Your memories are quite correct.

Billy: Okay, that shall be it. What also interests me and what I do not exactly remember: In Iran a civil war of short duration is supposed to break out shortly before the Shah's ousting. Do you still know, when this shall be?

Semjase:

Sure; on February 9, 10, and 11, 1979.

Billy: The entire absurdity will cost many human lives, if I guess right. Also up to about one thousand death sentences shall thereafter be carried out under the protectorate of the murderer Khomeini. In truth the entire matter on account of Khomeini and the Shah is not purely political, but it will refer to this, because Khomeini wants to avenge himself on the Shah, because the father of the Shah, long time ago, had Khomeini's father murdered. Is that true?

Semjase:

Sure, that is correct.

Billy: Good, I only wanted to know that.

Semjase:

Then I can impart to you other and more important things.

Billy: If you permit, I would have one further question.

Semjase:

Go ahead, ask, because you would not let it rest anyway.

Billy: You are quite right on that.

Semjase:

Then ask now.

Billy: This refers to Vietnam and China. Is China really going to attack Vietnam by or around the end of February? And shall this really only be a fake attack, which constitutes the very first precursor which, repeated at a later time, shall then create the actual starting point of the Third World War, at least the part which will be started by China?

Semjase:

You are quite accurately informed about these things, also that everything will be unavoidable, and that it actually will occur.

Billy: Good, my question is this: Your official data about the number of Jupiter moons is not correct, because it corresponds only to a portion of the truth. According to my knowledge, this giant planet has 17 moons, as I learned from Ptaah during my great journey

Semjase:

That is correct, but this is not allowed to be made known on the Earth before the month of September 1979, for special reasons; thereafter, this fact does not matter any more. Besides, during the course of their photo evaluations of Jupiter, the American scientists will discover two additional moons of the planet. . .

Semjase:

Think about the prophecies of the threatening Third World War.

Billy: --- Ah, now I got it. You speak of the prophecies, which talk about the overthrow of the murder-Cesar, Shah-in-shah Mohammed Reza Pahlevi, of which you have spoken already, and of the death of the Yugoslavian dictator, Tito, whose life shall end during the coming three years, when the light of Saturn beams down on the Earth, and about the Soviet-Russian Army marching into Afghanistan by the end of the year 1979, as well as the re-election of Indira Gandhi as president of India and then her following death, which will shake the entire Indian nation, as well as the pact of the Americans with different Near Eastern and Far Eastern nations, to which is added the Pakistani pact with the Chinese, besides many other expected events.

Semjase:

Sure, I speak about that, however, in such minuteness of detail no such prophecies were transmitted to you, because such details were not mentioned, namely these originate from your own calculations.

In any event, you did not receive these from us.

Billy: I am sorry, in fact I have calculated a little about the events to be expected.

Semjase:

My words are not meant to reprimand you.

Billy: Then I misunderstood you.

Semjase:

Hopefully, you have not spoken to anyone about it?

Billy: No.

Semjase:

Then all is alright.

Have you calculated any other details?

Billy: I have, namely, several political plottings, which must lead to the fact, that the ways for the fulfillment of the prophecies actually will be paved.

Semjase:

Which possibilities have you calculated?

Billy: For example, as I said already, I stumbled upon that the Pakistanis, and in fact the West Pakistanis, will form a military and economic-political pact with the Chinese, so that these could find unhindered entrance into Pakistan. This, according to logic, must lead to the fact that the Chinese will firmly establish themselves in Pakistan, and pave the way and take possession of the western part of the Indian Ocean, by which for them the out- and inroads to Arabia are opened, if in the future, they want to advance into the Middle East, in order to fulfill the prophecies there. My calculations also revealed that the Americans could get involved with the Pakistanis and Chinese, because they must fear an advance of the Russians from Afghanistan to the Indian Ocean, by which all circumstances will be even more confused, and by which the Russians will be forced to take further steps, which could produce very evil results, and which will be the beginning for the bear to break loose, as this is written in the prophecy. My calculations also revealed that the Scorpio, Indira Gandhi, in her manner of inconsistency and of power intrigues, could take a sudden catastrophic political step in the direction of Russia, which means another new danger for the entire world peace, because then the Russians will also establish a foothold there, namely in India, and again have free access to the Indian Ocean, the same as if they would break through Persia or Pakistan, whose leaders are so childish and insufficiently educated and foolish, that the possibility must be attributed to them, that they could pave and open the way for the Russian Army. All the calculations show, that the situation will become so confused, that hardly any correct resulting action is recognizable. To this are added the confusions of various independent and other nations in Europe, as well as the inconsistency and wrong direction of the leading powers of these nations, who are worse than half-grown children in their power of decision-making and logic, so that there also lurk additional malicious political dangers, intrigues and unconscious moments of destruction, which contribute their part to the beginning of the downfall, even if at the point in time of the first world-affecting crisis, after the Soviet Army marching into Afghanistan, several super-smart politicians etc. will maintain that a Third World War could not threaten any more. These super-smart ones and the know-it-alls do not consider, that the Third World-fire will not suddenly break out as such, but that, as the beginning already proves, and will soon prove again after the marching in of the Russian Army into Afghanistan, that at first different nations will get into each others' hair and in doing so, allow war-like actions to break out, before the greater alliances of different nations take place, which then lead to the world-fire. UNO and NATO then have nothing to say in that regard, and already from the time on, when the Russians will march into Afghanistan, besides which they must do by the end of 1979, because they are obligated by treaty to do so, therefore they march in there on a regular basis, which does not make it a war-like aggression. But UNO and NATO after this occurrence will become puppet organization already, because they have never been constructed in their operational capacity as this should have been the case. Those responsible for these two organizations and those who are part thereof in other forms, were truly never able to establish these organizations into what they should fundamentally have become. So at the given point in time, they cannot claim sufficient power and respect for themselves, in order to change the world-political situation, or even to decisively influence it, to gain a change for the positive. But these leading powers are not able to do this, therefore, with their two organizations, they also can not change anything about the threatening fulfillment of the prophecy, when within the year the beginning of the end begins to approach.

Semjase:

You have intensely engaged yourself in these matters, not just a little.

Yes, your statements sadly correspond with the bitter truth, but in all this various matters something could still be changed for the better, if you would publish a clarifying text and submit this to the governments, and if a positive reaction would occur to your statements, which unfortunately, is not perceivable.

Despite this you should, at the given time and indeed during the month of February 1980, publish these statements and explanations and submit these to the governments of the nations of Earth.

Billy: If this is your desire, then of course I will do it, but to say honestly: I do not promise myself anything there from, because no one will listen to a single human being, especially not when he is decried as a crazy one and fantasizer, as it is the case with me.

Semjase:

Nevertheless, you should do it.

Billy: Okay, your desire shall also be mine. Shall I list details and specific dates in it, as for example, the date of Tito's death and of Indira, as well as the sad and murderous misery that will break out in Persia after the taking over of power by the insane Ayatollah Khomeini? And shall I also name his inglorious end, and that of the murder-Shah, which both are facing?

Semjase:

No, about that you are not allowed to make any announcements, because this would lead to confusion and catastrophes, which you could never responsibly stand up for.

Billy: Then the events are also taboo, which will be played out in Germany, Switzerland and America and which also reach outside of politics?

Semjase:

About this also you have to keep silent, as well as about what will happen in the South American nations, in Africa and in various European nations regarding bloody occurrences of political and criminal nature.

You should also not make any more predictions, as I already have suggested to you.

Billy: Do you mean with that only the political criminality, which, in the future, will exhibit unusual deterioration, or the criminal criminality which will take on a similar malicious course?

Semjase:

It pertains to everything.

Billy: And what about the fanatic murders, suicides and massacres of the religious sectarians, who will start real butcherings? And, for example, what about the Queen of Holland, who according to my calculations would abdicate in the spring of 1980? Do I have to deep silent about that also?

Semjase:

If it refers to such harmless matters like the abdication of this Queen, then the revealing of your knowledge does not play a big role, because this Queen does not occupy a world-political role,

which could conjure up decisive changes, due to an untimely revelation of the fact that she will resign her office. Besides, I did not know anything about it until now, that this Queen will abdicate her office. Do your calculations regarding this check out?

Billy: I think so. Have you not concerned yourself with these matters?

Semjase:

No, because up to now there was no cause to do so, as the nation of this Queen is presently of no important meaning, because the foreign politics of this nation prove to be relatively flat. But now, I like to explain other matters to you and also ask you, if you also have established calculations regarding the Olympic Games of the year 1980, of which a part shall be carried out in Russia?

Billy: No, why, should I have done that?

Semjase:

No, it only would have been interesting for you, and besides I could have saved myself some explanations.

Billy: No, I have not concerned myself with that. I did not know why I should have done so. These games are not of such importance, that they would have a decisive influence on the coming world situation, or? The Olympic Games are really a non-political matter and were brought into existence in this form: According to my knowledge, if I am right, the founder of the Olympic Games was Pelepon; a distant descendant of a Minoan philosopher, who in the year 468 B.C. called these games into being, whereby he set the rule, that every four years competitive games would take place in a manner of sports with fist fights, riding and riding games, with long distance running, armed sports fights, with speakers, poets, philosophers and artists of all kinds. He also called into existence a kind of five-fight. His condition at the inception of the Olympic Games was, that those participating in these competitive games were all members of Hellenic tribes and Minoan descendants, who would come together in united and peaceful manner, as also the inhabitants of other nations, whereby a peaceful coexistence and true peace should be established. His conditions were further, that even political differences or even acts of war between various participating nations, should never be a reason for these nations and their athletes not to participate in these peaceful games and competitions. His conditions particularly were intended, that the Olympic Games should never be used as political pressure nor as peace infringing means.

Semjase:

Your statements regarding these matters are remarkably accurate, but in one point you are quite in error. The Olympic Games, unfortunately, since many decades, are already caught in the machinations of politics of earthly governments, and for the first time, this will be expressed worldwide in the year 1980.

Billy: This surely could not be true. Perhaps due to the fact of the marching in of the Russian Army by the end of 1979?

Semjase:

You are very clever and think fast. Sure, this will be the reason.

Billy: Then I can figure out what will happen. The first ones to scream will be the Americans and try to undermine and boycott the Olympic Games in Russia. Joining in with the wolf's howling soon will be the various nations, and thus force a worldwide Olympics-boycott, whereby certainly also at least about 50% of the Swiss people will join in this ignoble dance, because most Swiss citizens in truth never remain neutral and conduct the dirtiest politics of which, however, they have not the slightest inkling. But perhaps this is good, because by this action the world at large will learn clearly and distinctly, of which spirit the majority of the Swiss people truly are, and especially, where the much-praised neutrality lies and how far it reaches. Ah, this truly is a dirty pigs' business, I say, meaning both, namely, first this deceptive neutrality of many Swiss people, and on the other hand, that such a dirty intrigue of an Olympics-boycott could even take place at all, that politics get mixed up in these competitive games. That contradicts in every form the original ideas, desires and conditions of the founder of the games, as well as of those people, who for nearly three thousand years past have participated in these games in peaceful and condition-aligned manner. This truly is a dirty mess, and those who concocted this mess are as well hopeless pigs like those who support them. This I wanted to say in absolute neutral opinion and in regard of the fact, that the conditions in reference to peace, the creation of peace and everything in connection thereto established by the founder of the Olympic competitions, I value and honor as probably the most admirable achievement of an Earth human. But what does it matter, if some pig heads, who call themselves human, scrupulously stamp into the ground this most noble idea and achievement of a peace-loving man, thinking far ahead, only in order to prove their power and to hide their dirty fear, as well as their absolute inability to govern and to reach correct conclusions, which would finally create a world-wide peace. But these guys neither have any notion about the leadership of a civilization, nor a notion about leadership of one nation, not to mention that they should feel bound to a promise, which their most ancient ancestors made and swore to, in order to finally create peace on Earth. Oh damn it, how damn dirty must these pigs be. Damn, damn . . .

Semjase:

You are extremely excited.

Billy: How should I not be, damn it again. What do the Olympic Games have to do with the entire mess of politics? Nothing, absolutely nothing. Quite to the contrary, they should be a work, designed to create peace and to uphold peace among the people of Earth, without only one world of dirty politics getting involved therein.

Semjase:

Sure, your words represent the deepest truth, and all your statements about the entire matter are no less truthful. Yet, you should not excite yourself because of it, but act at the given point in time.

Billy: That I will do, and up to then, I will not let anything be perceived. When shall I start?

Semjase:

In the first or second week of February 1980.

Billy: That I will do. Damn it again, I am truly neutral, but with this mess one really has to plow in.

Semjase:

Certainly, and with this you saved me many words, if I would have needed to explain all this to you. Your neutrality you will maintain, nevertheless, even if you will declare these matters at a given point in time. You once and only represent the facts, without getting politically involved. Therefore, no logical thinking person can accuse you then of breach of neutrality. Only, when you do your work, you have to state facts and only facts.

Billy: That I certainly will do, and I will not get involved in political concerns, that is not for me anyway. To me Russia is Russia, and America is America, or China China, and Switzerland is Switzerland. And every single human being in either this or any other nation of Earth is simply a human being. To me nobody is a Swiss person, a Russian person, an American, Chinese, a German person or whatever could refer to their nationality, because everyone to me is only a human being. . .

Semjase:

During our conversation you explained that you have calculated several dates of the future.

Billy: Right.

Semjase:

We also spoke about the Yugoslavian head of state, of his demise. Regarding this, did you calculate an exact time of death and the date of his departure from this sphere?

Billy: I have: Here, on this slip of paper I have written everything down. But in regard to this, it is strange that I calculated two different dates. The first is February 24, 1980, and the time thereof 22:10 PM. The second date is May 4, 1980, and the time thereof 15:05 PM and 47 seconds. That I came up with two dates I do not understand.

Semjase:

Your calculations are quite accurate, the one as well as the other date is correct. Tito, the Yugoslavian dictator, will end his physical life unofficially on the date of February 24, 1980, he should respectively at this point in time. Truthfully, however, it will be as previously with Generalissimo Francesco Franco in Spain, that he will die a tormenting death, because the physicians with their skills and machines will keep him alive until death officially takes place on May 4, 1980. From February 24, 1980 on, however, it will be like this for Tito, that as a national power he will be put out of office, without the possibility that he can even execute the minutest of his government matters. Unofficially, he will be dead already as of this date.

Billy: Ah, now I understand.

Semjase:

Have you conducted any other calculations regarding Persia, the Iran respectively, which lead ahead?

Billy: No.

Semjase:

Then I still will explain a few events, which could be of importance to you:

Around the turn of the year 1980, fanatic and Khomeini-supporting students, will attack the American Embassy in Tehran and take the entire embassy personnel hostage. This will lead to extreme difficulties in America's internal and foreign politics, as well as quite inconsiderate and childish

actions of the American president, who among other things, will order a freeing attempt of the hostages to be carried out which, from the beginning, is condemned to failure. The suffering ones will be the prisoners only at the American Embassy, as well as about a dozen American families in the USA, because due to this insane freeing commando of Carter for the hostages, about 12 American soldiers will lose their life due to an accident. Due to the absurdity, inability and the confusion of the American president, the action will be started with flying machines unsuitable for this purpose. The largest number of these planes will be destroyed due to their uselessness, together with about 12 human lives of the commando of volunteers. This event furthermore will stir up the already months-long crises between the Americans and Iran, and will not come to an end soon even after this time. This happens especially due to the fact, that different power groups within the nation of Persia contribute worries, problems and war actions to the revolutionary nation, and because the Islamic leader, Ayatollah Khomeini, having gone insane, will have driven the majority of the Iranian people to serving him in insane fanaticism. In the end this will finally lead thereto that at first, external terror acts will find their beginning outside of the nation, namely the first one in England, where the Iranian Embassy will also be occupied and another time hostages will be taken. But these doings also will have bad repercussions.

Billy: With your words you mean just now, that this Khomeini already has gone insane?

Semjase:

Yes, that is the meaning of my words.

As of now he has not arrived at a state of total insanity, but this very soon will be the case.

Billy: Then one could not even talk reasonably with this guy?

Semjase:

No.

Billy: What I still wanted to ask: Where will the Shah-in-Shah and his Shahbana disappear to?

Semjase:

President Carter of America will make the unpardonable mistake that he will grant the fleeing couple temporary asylum, which will lead to consequences at the embassy in Tehran.

Billy: You speak of a temporary asylum. Where does this guy go thereafter, this murder-boy?

Semjase:

If I wanted to tell you everything, it would lead too far.

But I will explain this much, that Pahlevi is sick for some time with cancer and, therefore, will be treated in America.

After that, his next place of refuge will be Panama, and thereafter Egypt, where he will undergo further medical treatment.

Billy: His end in any case will be inglorious.

Semjase:

His end is quite tormenting, but let it suffice with these explanations.

Billy: As you wish; do you still have other news?

Semjase:

Sure, also for your nation.

Billy: You mean Switzerland? What is so important there? I only calculated that in Switzerland also much will happen. In Bern will be murder and manslaughter, because an embassy will be taken by force. Also Geneva and Zurich will not be spared from terrorist- and anarchistic attempts.

Besides, terrible criminality gains the upper hand, and in Zurich, one morning after the New Year 1980, a severe bank robbery attempt will take place, during which two gangsters and a policeman will be shot. In addition, from 1980 on, all of Switzerland will be snowed with murders getting out of hand, and political difficulties will appear, which are severe and have previously been unknown in Switzerland. Atomic power plants will be attacked by groups of radicals, whereby also severe destruction can be calculated. In the Federal Council itself, during the time after 1980, internal difficulties and differences will arise, which lead to serious economic conditions and cause certain changes within the government. And, which I almost forgot, in April 1980, Switzerland will, for the first time, receive an official state visit by the royal couple from England: Elizabeth and Philip will visit Switzerland.

Semjase:

You have calculated a lot.

Billy: I have, yes, but you know, several things would still interest me, for which I simply did not have the time to calculate.

Semjase:

Certainly, what do you wish to know.

Billy: You probably remember quite well, what was said regarding the details around Tito's death in the prophecy, which I received years ago. I already wanted to ask you about it before.

Semjase:

You speak of that prophecy . . .

Billy: True, at that time was transmitted to me, that at the time of Tito's death, a quake would roll through the oceans.

Semjase:

Sure, but I do not understand what the purpose of your question is.

Billy: This is quite simple: I see something in the fact, which has to mean more than a simple seaquake. As I understand it, this seaquake must be the real cause for something much worse. I fancy myself to understand something regarding prophecies, so that from them I am able to recognize certain things, which remain hidden to the layman.

Semjase:

That this is so I know, and you also have correctly presumed.

Billy: Good, then tell me first, where this seaquake will take place and what happens thereafter. The seaquake is only a precursor, or?

Semjase:

Yes, unfortunately, and it will be in the ocean, to the West of America.

Billy: Aha, now I understand a bit more already. Am I right in the assumption that this quake precursor is related to the San Andreas Fault?

Semjase:

Yes.

Billy: Aha, this can mean, that somewhere in America, suddenly a volcano erupts, or?

Semjase:

You have a keen mind.

Yes, this is so.

A volcano, dormant for many decades, will suddenly erupt, to rain death and destruction across the wide land.

This will be Mount St. Helens, which will destroy many lives and bury much land underneath.

The seaquake, originating at the time of Tito's death will not be too severe, so that people of Earth will not be moved.

But this quake will be a bad sign for the threatening eruption of the St. Helens volcano, which is connected to the San Andreas Fault, that stretches down from the high North of western America, down to the far South of this nation.

At first the scientists will not see the connection of the small seaquake to the volcanic eruption.

Also at first, they will assume that the volcano will soon quiet down again.

But in this they will deceive themselves, because they do not recognize the direct connection to the San Andreas Fault.

But already 10 days after the eruption, several scientists will consider the event and recognize that the San Andreas Fault plays an important role in these events.

At this time, however it will already be so that in the San Francisco area severe earthquakes take place.

And only these will point the scientist to the fact that the San Andreas Fault is involved.

Think about the prophecy given to you on February 4, 1976.

It speaks about San Francisco being destroyed.

Time will come full circle with the eruption of the St. Helens volcano, when the beginning of the end truly begins.

About this is written word for word in hour prophecy in verse-form:

And the city on the trench will be totally buried.

Billy: I know, but I did not learn the prophecy by heart.

Semjase:

Naturally you did not, but instead I can recite it for you by heart.

Billy: Really? Then go ahead.

Hello PAR people,

As some of you may recall:
last spring, Michael Horn
and I debated a few points

here and I decided that I needed to do some research to solidify my position, so I did. That report is the result. It was originally posted to the PAR group. After I posted it, someone from IIG-West asked me if they could put it on their web site. I added the introduction and formatted it to look better when printed and sent it to them.

Michael Horn wrote:

> Yes, not only did I see and read it but it actually
> proves Billy was truthful.

DB (and other newcomers), you

might be interested in
Michael's original replies to
my report:

March 9, 1979.

As I said in my report, the information I found led me to believe that the Billy Meier Contacts are most likely a hoax. Michael Horn thinks the same findings help prove the case genuine. Go figure. I think the main difference is that Michael accepts the dates given by Billy Meier and Wendelle Stevens and I don't. I tried to confirm the publication dates that Michael quotes, but I could not. Can

anyone provide
documentation for the
publication dates of that Meier
information?? The only
details Michael has given
about the October 1978
publication of the 115th
Contact Notes is statements
that all the Contact Notes
are distributed to some people
in Europe shortly after
they are written.

> More importantly, the author
assumes all sorts of
> things not in evidence, such
as Billy's access to,
> and understanding of, the
scientific information re
> the Jupiter discoveries

As I said in the report: "The information I reference was generally available and likely was reported in a variety of publications worldwide." I think that is a completely reasonable assumption.

- > publishing scientific information sure to attract
- > criticism if it was wrong, which it wasn't, etc.

According to the information I found, some of Meier's scientific information **was** wrong. Read the report again if you are interested in the details.

information.

Before being impressed by such
predictions, I need to

have the exact text of the prediction and a confirmed date that the predictions were written. Can anyone provide that information for the predictions Michael is talking about here?

Michael's "Proof Beyond A Reasonable Doubt" paper says: "Witnessed by the three men, the information was secured until after the following specific, predicted events occurred". So, it sounds like the information wasn't widely disseminated until after the events occurred.... A competent magician or anyone with more

than two friends could duplicate that feat without any help from ETs.

As you can see, I am unable to confirm to my satisfaction that Meier has successfully predicted anything.

I am interested in references to any documented facts on the subject. I would prefer not to argue about different interpretations of gray areas (such as whether Metis andAdrastea are big enough to be considered moons of Jupiter, or whether the personal

testimony of Marcel Vogel or
Wendelle Stevens is
believable). If the case is
genuine, surely there are
some clear-cut facts out there
somewhere.
