Subject: Re: The Real McCoy

Hi George,

Just be objective. You cannot produce the photos or you would. You cannot produce the photos because, according to the definitions, parameters and standards of the protocols (view the document for free: www.theyfly.com on the "Meier 8mm Films" link) you would have to be photographing a real UFO. Prove me wrong. The skeptics said they could. They failed. That's test number one as **AGREED** upon by the skeptics themselves. And that's why their little boat has holes in it. Is that clear? First meet the challenge then, if you're good, more evidence!

If the predictions are "pretty obvious with 20/20 hindsight"...how come *you* didn't make them? Perhaps you have some now that you'd like to make. Feel free to use as much space as you need.

As far as serious money from this, I haven't quit my day job and my 25 years of research was done on my own dime. Have you spent 25 years researching anything for free? I think \$1 per year on my \$25 DVD is kinda okay, don't you?

The failure of the skeptics to duplicate this "easily duplicated hoax" is sufficient simply because ALL of the scientific analysis has *already been done*, and by credible experts in their fields using the best available equipment. But, even more important, the specific prophetically accurate information, such as regarding Jupiter, that's been safely nestled in copyrighted, published books and documents years, and decades, before occurrence or "official" discovery, is **LEGAL PROOF. Try, try to understand, LEGAL PROOF.**

Further, once something has been scientifically proved, it isn't required to go and prove it again, especially to satisfy a pathetic busload of bozos who, you may be unaware, have been slandering Meier for years...without substantiating their lies at all. No proof, just character assassination. They're about to get far more than they bargained for. What is required by those who claim that something's hoaxed is to prove it and, not to be boring you here with redundancy, the party magicians **ACCEPTED THE CHALLENGE TO DO SO AND FAILED.**

And, it may surprise you to know, the vast majority of people who write me (after

Art Bell there were hundreds, reflecting even greater numbers, of course) fully understand that the skeptics are pseudo-scientific poseurs who have lost, and lost big time. The story of their bumbling and humiliation is spreading across the globe on its own, I don't have to say another word about it, people write and tell me!

So, while Randi and company may think the world revolves around them (it may, as curiosity seekers start to gather to watch clueless masochist flagellate themselves) the truth is that they are now spiraling into oblivion, victims of their own dishonesty, fraudulence and deceit.

Personally they may be nice guys but as professionals they're, well, they're simply **NOT** professionals.

Now, if you want to take a crack at some photo, film, video, sound recording, metal alloy sample and prophetic accuracy duplication...be my guest. But do familiarize yourself with the exiting test results and, please, don't underestimate the intelligence of those who see through the transparency of disingenuous "offers".

Regards to all,

Hello Gentlemen,

I have been reading with interest the wonderful debate ongoing between your various camps :)

I am a skeptic, which , I guess by definition , means that I am willing to be convinced, one way or the other.

Having read the various books and sites available , I must say that this debate is a real wonder :)...Both sides claiming wonderful evidence both pro and con.

The photographs look great on both sides...but I myself could produce very similar results...The prophecies are compelling...but not tangible in the way of proof...Much of those predictions look pretty obvious with 20/20 hindsight :)

But...the real thing intriguing me, and SURELY the easiest way to prove either case , without a shadow of a doubt, is the purported PHYSICAL evidence...now thats interesting.

Okay both sides have been getting wonderful publicity on this, and no doubt making serious money from what I can see(no criticism implied...its obvious from your website Mr. Horn)

Surely the easiest way to satisfy both sides...and all the intensely interested bystanders, would be to cut the rhetoric and arrange , to both parties satisfaction, independent analysis of the physical, metallic, evidence claimed. This should be no problem if, as you claim Mr.Horn, the evidence has already past stringent tests. Likewise, Im sure Mr . Randi and the sceptical side would eagerly await the results of a truly independant test. This would surely be the clincher :)

So what do you say Mr. Horn...You claim that irrefutable PHYSICAL, PALPABLE evidence is available in your hands...correct? So prove it please...I , and BILLIONS of others would love to know, and if you are right...then the \$1,000,000 JREF prize will be nothing compared to the worldwide acclaim from ALL that you will receive...for surely this is one of the most important thigs to prove in the history of the planet.

I am Nemo, and I'm sure I speak for every Nemo out there...please enlighten us...all of us,

Regards,

George [last name removed]
