Subject: Re: UFO case

Michael,

Exactly as I thought - all of Meier's critics are "liars" and "cowards", and hence can be summarily dismissed. Meanwhile, all of Meier's hokum, including his claims to have flown in space and taken photos there, is treated as highly credible stuff. (Some of Billy's space photos are at <http://meiercase.0x2a.info/meiercase/temp/index.html>, linked to by your website, but apparently they are so totally bogus that even Meier himself is now disavowing them!!!!.)

And, not surprisingly, you're trying to wriggle out of your sensationalist claim that the asteroid Toutatis threatens the world on Sept. 29. But you can't get out of it, it's all been archived. For example, see <http://archives.zinester.com/40491/15876.html> .

best,

Robert,

Exactly what integrity do you presume to have when you quote me already discredited, second hand sources?

First, my position as media rep is completely voluntary and unpaid. Next, if you were at all informed you'd know that Kal Korff, twice publicly self-admitted liar that he is, has been thoroughly debunked by two separate, rather diligently researched sources, links available at my site. Korff is an unreliable liar, anything else you want to rest on his credibility?

Stanton Friedman "thinks"? Please!

Randi indeed claimed the case is a hoax and then retracted it, I have the correspondence. His affiliated organization, CFI-West, accepted the challenge to duplicate one of Meier's photos and one of his films, which they had called "easily duplicated hoaxes". That was in Feb. 2001. They failed to do so. They publicly refused to have the photos they finally came up with two months ago subjected to the same standard of tests as Meiers. Result: ALL professional skeptics to date have failed to back up their claims that there was ANY hoax in the case and have failed to duplicate even one photo...let alone the freely available sound recordings from my site, etc.

As for the reporter, he wanted all the info he could get out of me in five minutes and I obliged. It was one rapid interview and nothing I told him, nor to my recollection, anything he printed, was inaccurate factually, I'll reread to check.

If you can provide any proof for the "solid debunking" of the Meier case please deign to do so. I thought not.

I am on record as quoting Meier who stated that Toutatis will not pose an immediate threat to earth and will pass within about 1,000,000 miles.

In view of all your misstatements and escape attempts, it's obvious that you're simply another slandering coward who relies on the unreliable, second, third or fourth hand nonsense of proven liars or those who indeed do have a vested interest in defaming the case.

The record, therefore, is that you're another know-it-all who can't back up his claims. I'm sure you're "too busy" for someone who can shred your puny arguments and who isn't susceptible to the glib, debunking of easy targets that you poseurs seem to enjoy. However, if you ever get the courage to put up or shut up I'd be glad to oblige. In the meantime...

...you're dismissed.
